

A

Acer Rubrum

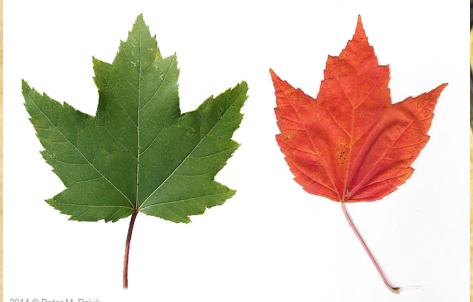

Red Maple

Native

Acer Rubrum is a native tree that thrives in both wet lowlands and dry and rocky highlands. It can withstand drought, soil compaction, and salt.

Landscape Notes: can be 40-60ft in height, great shade tree. Root system is exposed so do not plant grass around it, ring with mulch. Do not buy grafted maple.

Leaves: Opposite, deep sinuses, serrated margins, 3 lobes, palmate veination

Native

Buds: Clusters of slightly rounded and reddish buds

Bark
